General Conditions of the Company Jäger Computergesteuerte Messtechnik GmbH

The following General Conditions are contractual requirements for all agreements with the company Jäger Computergesteuerte Messtechnik GmbH (called "Jäger Messtechnik GmbH" hereafter). These terms will also be valid when a customer's order contains divergent conditions and Jäger Messtechnik GmbH does not contradict. Changes, supplementary, and second agreements need to be made in writing. The customer accepts the General Conditions when ordering the goods, at the latest however, with delivery of the goods.

These General Conditions are also valid for all development contracts which are considered accepted by Jäger Messtechnik GmbH, a supplementary agreement will be made in the case of a development contract as described below in "Conditions for Development Contracts".

Furthermore, if software is purchased we refer to the supplementary terms of the license agreement of Jäger Messtechnik GmbH.

1. Confirmation of Order

All offers made by Jäger Messtechnik GmbH are subject to change. All orders, also when accepted by representatives of Jäger Messtechnik GmbH, will only be binding for Jäger Messtechnik GmbH with its written confirmation of order or with delivery of the goods.

2. Terms of Delivery, Prices

- 2.1 Liability passes to the customer at the moment the goods are handed over for delivery.
- 2.2 If Jäger Messtechnik GmbH delivers the goods—at the customer's request—not to the customer himself but to a third party, liability and costs pass to the customer at the moment the goods are handed over to the forwarding agent.
- 2.3 The decision about the method of delivery and the choice of the means of transport is left to Jäger Messtechnik GmbH. Additional costs for a special delivery method, requested by the customer, are charged to the customer. If the customer wishes to delay the delivery, liability passes to him at the moment the goods are announced to be ready for shipment.
- 2.4 Jäger Messtechnik GmbH guarantees that a transport insurance has been settled on its own expenses to insure the goods sufficiently against damages.
- 2.5 Customs duty, V.A.T. and other expenses for import into European or non-European countries are charged to the customer..
- 2.6 Jäger Messtechnik GmbH, even if it has agreed upon keeping schedules and deadlines, cannot be held liable for delays in delivery and performance due to force majeure and events which render delivery essentially more difficult or even impossible for Jäger Messtechnik GmbH—such as subsequently occurring difficulties in providing the material, breakdown in production, strike, lockout, shortage of personnel, shortage of means of transport, official regulations, etc.—even if they occur at suppliers or subcontractors of Jäger Messtechnik GmbH. This applies also to delays in delivery and performance caused by subcontractors of Jäger Messtechnik GmbH. In such cases, the customer as well as Jäger Messtechnik GmbH may cancel the contract fully or partially because of non-performance after an adequate time. In this case Jäger Messtechnik GmbH cannot assume any liability.
- 2.7 If suppliers of Jäger Messtechnik GmbH rise the prices after a contract has been concluded, Jäger Messtechnik GmbH may pass the price increase to the customers.

3. Software

- 3.1 The customer has a single, non-exclusive, and an individual right of use regarding the software of Jäger Messtechnik GmbH. In this regard we refer to the conditions in the license agreement for software.
- 3.2 If Jäger Messtechnik GmbH renders standard software purchased from a third party to the customer, the latter gets a non-exclusive right of use, for whose contents and performance the terms of use, agreed upon with the supplier, are substantial. These terms of use will be disclosed to the customer.

4. Warranty

- 4.1 Jäger Messtechnik GmbH assumes warranty for the goods delivered insofar as the goods will be upon its own discretion fully or partially upgraded or repaired, or they will be replaced free of charge.
- 4.2 If two attempts to repair or to replace the goods fail, the customer may choose between either allowance (price reduction) or conversion (rescission of the contract).
- 4.3 Costs for an investigation carried out by Jäger Messtechnik GmbH because of an unfounded complaint are charged to the customer's account.
- 4.4 Warranty for components purchased from a third party in order to carry out an order will be assumed in such manner that Jäger Messtechnik GmbH will only pass the supplier's warranty to the customer.
- 4.5 Jäger Messtechnik GmbH does not assume warranty for the suitability of the goods regarding a certain intended purpose, if the actual purpose cannot be deduced from written instructions, delivered with the goods or if the suitability for an actual purpose has not explicitly been confirmed in written form by Jäger Messtechnik GmbH. In any case the customer himself agrees to check in advance and separately the suitability of the goods for his own intended purpose.
- 4.6 After liability has been passed to the customer, no warranty is assumed for damages, resulting from faulty or negligent treatment, inappropriate changes and repair work by the customer or a third party, or resulting from chemical, electro-chemical or other electrical influences, provided that they are not caused by Jäger Messtechnik GmbH itself.
- 4.7 All warranty or guarantee claims expire 12 months after shipment.

5. Reservation of Title

- 5.1 All title rights for the goods delivered, are reserved for Jäger Messtechnik GmbH, until payment is fully effected and all outstanding balances and accounts payable have been settled, regardless of any legal ground.
- 5.2 The customer may sell, process, or rework the goods upon reserved title rights. But title does not pass to the customer by processing the goods, contrary to § 950 of German Civil Code (so-called "extended" reservation of title). If the goods are processed with other goods belonging to the customer or upon single reservation of title, title for the new product will entirely pass to Jäger Messtechnik GmbH.

If the goods are processed with other goods delivered upon extended reservation of title, Jäger Messtechnik GmbH will obtain the co-ownership for the new product. The invoice value (V.A.T. included) of the goods delivered will be in relation to the invoice value of the processed products (V.A.T. included) at the moment of processing. By the customer's taking charge of the goods, the title for the new products will pass to Jäger Messtechnik GmbH.

5.3 Already at that moment, all the customer's claims with their entire subordinated rights resulting from reselling the goods pass to Jäger Messtechnik GmbH – regardless of their original or reworked state. The terms explained under 4.2 apply correspondingly.

5.4 Goods delivered upon reserved title rights must not be pledged or assigned to someone as a security. The customer is not entitled to pass or to pledge his claims, resulting from reselling the goods in their originate or reworked state, to a third party.

6. Limited Warranty and Claim for Damages

6.1 The customer releases Jäger Messtechnik GmbH from all charges and claims of third parties, which have been caused by violation of copyrights, rights of use, rights of privacy or other protective rights by reworking the goods delivered of Jäger Messtechnik GmbH.

6.2 Deficiencies of the goods delivered by Jäger Messtechnik GmbH have to be announced immediately in written form, at the latest however, within seven days after the deficiencies have been brought to your notice.

6.3 Jäger Messtechnik GmbH and its employees do not assume liability – as far as permitted by applicable law - for injuries to persons, damages in property and assets, especially for indirect and consequential damage, i. e. business interruption, loss of business profits which arise for a customer. This applies to contractual as well as to non-contractual claims of the customer. Liability with regards to the product liability law remains unaffected.

6.4 In the case a customer rescinds a contract or does not keep his commitment to take over delivery, Jäger Messtechnik may claim damages because of non-performance. In addition Jäger Messtechnik GmbH may claim damages to the amount of 25 % of the entire purchase price. A proof of damages is in this case not necessary. If it is a special design made for the customer, he has to pay the entire purchase price.

7. Place of Performance

Place of performance for deliveries and payments is the commercial domicile of Jäger Messtechnik GmbH – Lorsch.

8. Place of Jurisdiction

The only place of jurisdiction for both parties is Bensheim. But Jäger Messtechnik GmbH may also institute legal proceedings at the customer's general place of jurisdiction.

9. Application Law

The relation between the contract partners is governed by the law of the Federal Republic of Germany only, to the exclusion of the UN purchase law agreement.

10. Miscellaneous

10.1 If some terms of these General Conditions will become or are completely or partially void, the remaining terms are legally binding. Jäger Messtechnik GmbH will legally replace them by an appropriate term, which corresponds most of all to the void term.

10.2 With publishing these General Conditions, all General Conditions published earlier by Jäger Messtechnik GmbH will no longer be valid.

Supplementary Conditions for Development Contracts

Object of the Order

The object of the order results from the contents of the corresponding individual order.

Execution of the Order

Jäger Messtechnik GmbH warrants the accurate and appropriate execution of the order, according to the present

state of the art.

The customer will contribute to the successful execution of the order to the best of his abilities and will make available notably all necessary documents, his own knowledge, experience etc.

Success of the Development

Jäger Messtechnik GmbH does not assume liability for the success of a development, if the success has not or not completely been reached because of reasons which have not been discernible at contract conclusion.

Costs of Development /Time of Development

If Jäger Messtechnik GmbH recognizes that the order cannot be executed in the period of time agreed upon and/or at the price agreed upon, a supplementary agreement will be made by the contract partners about how the work will be continued and about the fact of paying the costs. If the contractual partners do not come to an agreement on this subject, Jäger Messtechnik GmbH may cancel the development contract and has the right to claim the charges for the development effort.

Secrecy, Publication

Jäger Messtechnik GmbH will not communicate customers' information - characterized as secret – to third parties, not even so after the development contract has been settled, as far as they are not known in public. The customer has the same obligation toward Jäger Messtechnik GmbH.

The customer may publish development results with mentioning the author and after prior agreement of Jäger Messtechnik GmbH, if there are no conflicting reasons, (e.g. endangering patent rights registration). If publishing is made for the purpose of advertizing, mentioning the author is on the request of Jäger Messtechnik GmbH not permitted.
